Checkpoint's SmartOccupancy solution provides College Bookstore Management with the most accurate sensor on the market: 99%, enabling true, real-time visibility of occupancy levels.

Accuracy is crucial. Inaccurate counts lead to discrepancies, which build up over the course of the day. Other occupancy solutions offer just +/- 80% accuracy, leaving a 20% error. For some businesses or organizations who see 500 people per day, this adds up to either a loss in potential revenue, or they have unknowingly let in 100 more people, violating the occupancy limit and endangering public health.

SmartOccupancy enables College Bookstores to operate safely and maximize revenues.

The solution can be applied to different zones within the same environment, such as the coffee shop and restrooms, in addition to the bookstore area. Managers can set and change threshold levels via the online portal.

- **MANAGES MULTIPLE COUNTING:** The sensor can count separately how many people entered and exited from each doorway.
- **CALCULATES TOTAL FROM MULTIPLE ZONES :** The solution gives a clear view of multiple thresholds with the overall total included.
- **RECOGNIZES U-TURN MOVEMENTS:** If someone enters, then exits immediately, SmartOccupancy will identify the movement, reducing false counts.
- **PRECISE COUNTING IN CROWDED AREAS:** Other technologies lose the accuracy in crowded areas. Our SmartOccupancy solution keeps high accuracy in crowded areas.

With real-time visibility of the occupancy levels, SmartOccupancy helps Managers make decisions with live data. The dashboard with color warning indicates where there is about to be a breach in the threshold, while real-time alerts are sent to key staff to prompt action. Trend analysis in the cloud helps College Bookstore Management analyze daily/weekly number of occupants, monitor compliance and amend threshold limits.

RED: Max occupancy reached **YELLOW:** Occupancy almost reached **GRAY:** No Occupancy alerts required

Visiplus 3D sensor	Mounting height	Coverage
 90 Series	 210 – 350 cm	 30 m ²
 180 Series	 300 – 600 cm	 64 m ²

Part Number	Description
10147103	VISIPLUS-3D SENSOR 90 BASE
